

12000-L-PBT

122xx-L-PBT – 2 Port Taps

124xx-L-PBT – 4 Port Taps

128xx-L-PBT – 8 Port Taps

1.2 GHz Full-Feature Equalizable Taps

FEATURES

- Support DOCSIS® 3.1 expanded bandwidth up to 1218 MHz
- Improve network performance with signal conditioning plug-ins
- Maintain existing installed base with housing compatibility back to 9000-L series tap housings
- High level of network resilience with 6kV surge resistance on feeder and 4kV surge resistance on tap ports
- Integrated bypass capability maintains RF and AC connections with faceplate removed

PRODUCT OVERVIEW

The ARRIS 12000-L-PBT 1.2 GHz series equalizable taps offer improved return path performance for advanced two-way HFC systems, while maintaining backwards compatibility with previous legacy Philips/C-COR installed base of taps using the deep body 9000-L series tap housing. The 12000-L-PBT tap series also allows for a direct drop in solution without the need to reconfigure the plant due to minimal loss changes to the current 1 GHz performance. As an added new feature in the new 1.2 GHz series of 12000-L-PBT taps now allow for signal conditioning with optional plug-in, field configurable modules that include cable equalizers, return path attenuators, and cable simulators. These plug-ins allow for drop signal conditioning without affecting the main feederline path.

12000-L-PBT Series Taps 5-1218 MHz
